Subject Index of Volume 185

Actinides
electrochemical properties of actinides in non-aqueous media – reduction of hexavalent U in various organic solvents, 151
local volume potentials for actinide metals, 353
Alkaline earth hydrides
tetracalcium trimagnesium tetradecahydride, $Ca_4Mg_3H_{14}$: the first ternary alkaline earth hydride, 273
Alumina
effect of thermal treatment on phase composition and thermal shock resistance of plasma sprayed calcia-stabilized zirconia–alumina composite coatings, 169
Aluminium
$Ca_{8-x}Li_xAl_3$: defects and substitution in the Fe_3Al structure type, 221
solution thermodynamics of H in mischmetal–Ni_5 system with Al, Mn and Sn substitutions, 259

Bismuth
existence of 2212-structure type phase in Bi–Sr–Nd–Cu–O system, L9
Boron
thermodynamic analysis of B_4C–SiC double layer on graphite, 121
effect of ingot heat treatment on magnetic properties of Pr–Fe–B–Cu H decrepitation sintered magnets, 81
BSCCO rods
DCZ and DCA of melt-cast Bi–Pb–Sr–Ca–Cu–O rods, 311

Calcium
$Ca_{8-x}Li_xAl_3$: defects and substitution in Fe_3Al structure type, 221
Calorimetry
calorimetric investigation of the Au–Pb system, 241
thermodynamic characterization of Zr–Mn–H system – reaction of H_2 with single-phase $ZrMn_{2+x}$ C-14 Laves phase alloys, 321
thermodynamic characterization of Zr–Mn–H system – reaction of H_2 with two-phase alloys, 339
Cerium
characterization of new Fe-1222 layered cuprate, $FeSr_2(LnCe)_2Cu_2O_y$, 45
Cerium oxides
characterization of cerium oxides prepared in H_2O and NaOH mixtures, 279
Chalcogenides
phase relations in systems of tin chalcogenides, 183
Chromium
formation of silver chromium spinels and structure determination of ferromagnetic $AgCr_2Te_4$, 89
Cobalt
electrical resistivity of $Lu(M_{1-x}Al_x)_2$ (M=Co, Ni), 59
Copper
characterization of new Fe-1222 layered cuprate, $FeSr_2(LnCe)_2Cu_2O_y$, 45
diffusion in amorphous and crystalline Cu–Ti studied by muon spin relaxation technique, 35
physical properties of $Zr_2CuH_{4.2}$ in relation to those observed for other $MoSi_2$-type hydrides, 7
effect of ingot heat treatment on magnetic properties of Pr–Fe–B–Cu H decrepitation sintered magnets, 81
Crystal structure
tetracalcium trimagnesium tetradecahydride, $Ca_4Mg_3H_{14}$: the first ternary alkaline earth hydride, 273

Degradation
disproportionation of $LaNi_5$ and TiFe in 4 MPa H_2 at 300 °C, 1
Direct current annealing
DCZ and DCA of melt-cast Bi–Pb–Sr–Ca–Cu–O rods, 311
Direct current zoning
DCZ and DCA of melt-cast Bi–Pb–Sr–Ca–Cu–O rods, 311

Disproportionation
disproportionation of $LaNi_5$ and TiFe in 4 MPa H_2 at 300 °C, 1

Electrical properties
electrical resistivity of $Lu(M_{1-x}Al_x)2$ (M=Co, Ni), 59
Electrochemical properties
electrochemical properties of actinides in non-aqueous media – reduction of hexavalent U in various organic solvents,151
Electrodes
activation behaviour of $ZrCrNiM_{0.05}$ metal hydride electrodes (M=La, Mm (misch metal), Nd), L1
Electromigration
electromigration and residual resistivity of H in row 5 and 6 transition metals, 207
Electronic structure
electronic structure of RBiPt compounds, (R=Y, Yb), 145

Gallium
crystal structure of $R_{15}Ni_{96-x}Ga_x$ (R=Sm, Y, Tb, Dy, Er, Tm, Yb, Lu), 19
information on $Mg_{2-x}Zn_xGaV_3O_{11}$ (x=0, 3), 163
Germanium
crystallographic data and magnetic properties of RT_6Ge_6 compounds (R=Sc, Y, Nd, Sm, Gd-Lu; T=Mn, Fe), 99
Gold
calorimetric investigation of Au–Pb system, 241

Hydrides
activation behaviour of $ZrCrNiM_{0.05}$ metal hydride electrodes (M=La, Mm (misch metal), Nd), L1
disproportionation of $LaNi_5$ and TiFe in 4 MPa H_2 at 300 °C, 1
physical properties of $Zr_2CuH_{4.2}$ in relation to those observed for other $MoSi_2$-type hydrides, 7
H activation of $LaNi_5$, 369
Hydrogen
electromigration and residual resistivity of H in row 5 and 6 transition metals, 207
permeability and diffusivity of H in Pd-rich Pd–Y(Gd)–Ag ternary alloys, 191
solution thermodynamics of H in mischmetal–Ni_5 systems with Al, Mn and Sn substitutions, 259
H activation of $LaNi_5$, 369
thermodynamic characterization of Zr–Mn–H system – reaction of H_2 with single-phase $ZrMn_{2+x}$ C-14 Laves phase alloys, 321
thermodynamic characterization of Zr–Mn–H system – reaction of H_2 with two-phase alloys, 339
Hydrogen diffusion
diffusion in amorphous and crystalline Cu–Ti studied by muon spin relaxation technique, 35
Hydrogen-induced amorphization
IR spectra of Pt-impregnated V_2O_5 powders on H insertion, 177

Infrared spectroscopy
IR spectra of Pt-impregnated V_2O_5 powders on H insertion, 177
Insulators
existence of 2212-structure type phase in Bi–Sr–Nd–Cu–O system, L9
Iron
improvement in cast structure of Sm_2Fe_{17} alloys by Nb additions, 251
nitrogenation of Sm_2Fe_{17} prepared by mechanical alloying and subsequent heat treatment, 73

Lanthanides
characterization of new Fe-1222 layered cuprate, $FeSr_2(LnCe)_2Cu_2O_y$, 45
crystal structure of $R_{15}Ni_{96-x}Ga_x$ (R=Sm, Y, Tb, Dy, Er, Tm, Yb, Lu), 19
crystallographic data and magnetic properties of RT_6Ge_6 compounds (R=Sc, Y, Nd, Sm, Gd-Lu; T=Mn, Fe), 99
temperature dependence of exchange field of $R_2Fe_{14}B$ (R=Sm, Pr, Nd, Gd, Dy, Tb, Er, Ho, Tm, Lu) compounds, 363
Lanthanum
activation behaviour of $ZrCrNiM_{0.05}$ metal hydride electrodes (M=La, Mm (misch metal), Nd), L1
disproportionation of $LaNi_5$ and TiFe in 4 MPa H_2 at 300 °C, 1

$LaRuSi_2$: monoclinic variation of orthorhombic $CeNiSi_2$-type structure, 235
H activation of $LaNi_5$, 369

Lead
calorimetric investigation of Au–Pb system, 241

Lithium
$Ca_{8-x}Li_xAl_2$: defects and substitution in Fe_3Al structure type, 221
preparation and structure of new nitride–oxide: $Li_{16}Ta_2N_8O$, 109

Lutetium
electrical resistivity of $Lu(M_{1-x}Al_x)2$ (M≡Co, Ni), 59

Magnetic properties
crystallographic data and magnetic properties of RT_6Ge_6 compounds (R≡Sc, Y, Nd, Sm, Gd-Lu; T≡Mn, Fe), 99
electrical resistivity of $Lu(M_{1-x}Al_x)2$ M≡Co, Ni), 59
loss of ferromagnetism in $PrYSi_{3-\delta}$, L5
structural and magnetic properties of nonequilibrium b.c.c. Ni prepared by leaching of mechanically alloyed $Ni_{35}Al_{65}$, 25
effect of ingot heat treatment on magnetic properties of Pr–Fe–B–Cu H decrepitation sintered magnets, 81

Magnetic structure
ferromagnetic ordering of $NdNiSi_2$ and $PrNiSi_2$ studied by neutron diffraction and magnetic measurements, 51

Manganese
solution thermodynamics of H in mischmetal–Ni_5 system with Al, Mn and Sn substitutions, 259
thermodynamic characterization of Zr–Mn–H system – reaction of H_2 with single-phase $ZrMn_{2+x}$ C-14 Laves phase alloys, 321
thermodynamic characterization of Zr–Mn–H system – reaction of H_2 with two-phase alloys, 339

Mechanical alloying
nitrogenation of Sm_2Fe_{17} prepared by mechanical alloying and subsequent heat treatment, 73

Molecular field theory
temperature dependence of exchange field of $R_2Fe_{14}B$ (R≡Sm, Pr, Nd, Gd, Dy, Tb, Er, Ho, Tm, Lu) compounds, 363

Molybdenum
physical properties of $Zr_2CuH_{4.2}$ in relation to those observed for other $MoSi_2$-type hydrides, 7

Muon spin relaxation
diffusion in amorphous and crystalline Cu–Ti studied by muon spin relaxation technique, 35

Neodymium
activation behaviour of $ZrCrNiM_{0.05}$ metal hydride electrodes (M≡La, Mm (misch metal), Nd), L1
ferromagnetic ordering of $NdNiSi_2$ and $PrNiSi_2$ studied by neutron diffraction and magnetic measurements, 51
existence of 2212-structure type phase in Bi–Sr–Nd–Cu–O system, L9

Neutron diffraction
ferromagnetic ordering of $NdNiSi_2$ and $PrNiSi_2$ studied by neutron diffraction and magnetic measurements, 51

Nickel
crystal structure of $R_{15}Ni_{96-x}Ga_x$ (R≡Sm, Y, Tb, Dy, Er, Tm, Yb, Lu), 19
disproportionation of $LaNi_5$ and TiFe in 4 MPa H_2 at 300 °C, 1
electrical resistivity of $Lu(M_{1-x}Al_x)2$ (M≡Co, Ni), 59
ferromagnetic ordering of $NdNiSi_2$ and $PrNiSi_2$ studied by neutron diffraction and magnetic measurements, 51
solution thermodynamics of H in mischmetal–Ni_5 system with Al, Mn and Sn substitutions, 259
structural and magnetic properties of nonequilibrium b.c.c. Ni prepared by leaching of mechanically alloyed $Ni_{35}Al_{65}$, 25
H activation of $LaNi_5$, 369

Niobium
improvement in cast structure of Sm_2Fe_{17} alloys by Nb additions, 251

Nitriding
improvement in cast structure of Sm_2Fe_{17} alloys by Nb additions, 251

Nitrogenation
nitrogenation of Sm_2Fe_{17} prepared by mechanical alloying and subsequent heat treatment, 73

Palladium
permeability and diffusivity of H in Pd-rich Pd–Y(Gd)–Ag ternary alloys, 191

Phase characterization
phase relations in systems of tin chalcogenides, 183
Phosphorium salts
chemistry of polyhalozirconates — preparation of some diphosphonium hexachlorozirconates, 67
Plasma-sprayed coatings
effect of thermal treatment on phase composition and thermal shock resistance of plasma sprayed calcia-stabilized zirconia–alumina composite coatings, 169
Platinum
electronic structure of RBiPt compounds, (R≡Y and Yb), 145
Plutonium
local volume potentials for actinide metals, 353
Polyhalozirconates
chemistry of polyhalozirconates — preparation of some diphosphonium hexachlorozirconates, 67
Praseodymium
ferromagnetic ordering of $NdNiSi_2$ and $PrNiSi_2$ studied by neutron diffraction and magnetic measurements, 51
loss of ferromagnetism in $PrYSi_{3-\delta}$, L5
effect of ingot heat treatment on magnetic properties of Pr–Fe–B–Cu H decrepitation sintered magnets, 81

Ruthenium
$LaRuSi_2$: monoclinic variant of orthorhombic $CeNiSi_2$-type structure, 235
preparation and crystal structure of actinoid ruthenium phosphides $ThRu_2P_2$ and URu_2P_2, 301

Samarium
crystal structure of $R_{15}Ni_{96-x}Ga_x$ (R≡Sm, Y, Tb, Dy, Er, Tm, Yb, Lu), 19
improvement in cast structure of Sm_2Fe_{17} alloys by Nb additions, 251
nitrogenation of Sm_2Fe_{17} prepared by mechanical alloying and subsequent heat treatment, 73
Silicon
thermodynamic analysis of B_4C–SiC double layer on graphite, 121
ferromagnetic ordering of $NdNiSi_2$ and $PrNiSi_2$ studied by neutron diffraction and magnetic measurements, 51
$LaRuSi_2$: monoclinic variant of orthorhombic $CeNiSi_2$- type structure, 235
loss of ferromagnetism in $PrYSi_{3-\delta}$, L5
physical properties of $Zr_2CuH_{4.2}$ in relation to those observed for other $MoSi_2$-type hydrides, 7
Silver
formation of silver chromium spinels and structure determination of ferromagnetic $AgCr_2Te_4$, 89
Sodium hydroxide
characterization of cerium oxides prepared in H_2O and NaOH mixtures, 279
Spinels
formation of silver chromium spinels and structure determination of ferromagnetic $AgCr_2Te_4$, 89
Superconductivity
existence of 2212-structure type phase in Bi–Sr–Nd–Cu–O system, L9

Tantalum
preparation and structure of new nitride–oxide: $Li_{16}Ta_2N_8O$, 109
Tellurium
formation of silver chromium spinels and structure determination of ferromagnetic $AgCr_2Te_4$, 89
Thermodynamics
thermodynamic analysis of B_4C–SiC double layer on graphite, 121
Thorium
local volume potentials for actinide metals, 353
Tin
phase relations in systems of tin chalcogenides, 183
solution thermodynamics of H in mischmetal–Ni_5 system with Al, Mn and Sn substitutions, 259
Titanium
diffusion in amorphous and crystalline Cu–Ti studied by muon spin relaxation technique, 35
disproportionation of $LaNi_5$ and TiFe in 4 MPa H_2 at 300 °C, 1

Uranium
electrochemical properties of actinides in non-aqueous media — reduction of hexavalent U in various organic solvents, 151

preparation and crystal structure of actinoid ruthenium phosphides, $ThRu_2P_2$ and URu_2P_2, 301
V_2O_5 powders
IR spectra of Pt-impregnated V_2O_5 powders on H insertion, 177

Vanadium
information on $Mg_{2-x}Zn_xGaV_3O_{11}$ ($x=0$, 3), 163
Volume potentials
local volume potentials for actinide metals, 353

Ytterbium
electronic structure of RBiPt compounds, (R≡Y and Yb), 145
Yttrium
electronic structure of RBiPt compounds, (R≡Y and Yb), 145
loss of ferromagnetism in $PrYSi_{3-\delta}$, L5

Zinc
information on $Mg_{2-x}Zn_xGaV_3O_{11}$ ($x=0$, 3), 163
Zirconia
effect of thermal treatment on phase composition and thermal shock resistance of plasma sprayed calcia-stabilized zirconia–alumina composite coatings, 169
Zirconium
physical properties of $Zr_2CuH_{4.2}$ in relation to those observed for other $MoSi_2$-type hydrides, 7
thermodynamic characterization of Zr–Mn–H system — reaction of H_2 with single-phase $ZrMn_{2+x}$ C-14 Laves phase alloys, 321
thermodynamic characterization of Zr–Mn–H system — reaction of H_2 with two-phase alloys, 339
